

## CONSULTANT DIRECTORY

The persons listed in the Directory have volunteered to share their experience with integration of genomics in their clinical settings. They may have been identified as the Administrator or Educator dyad team member, so consider the types of questions you have before selecting who to contact. They are also listed as type of clinical setting (i.e., academic, community, pediatric, behavioral health) including number of beds. That may help you find settings that are similar to your own.
